Hello from SunlightOS!

A lightweight PDF document for testing your native reader.

1. Text rendering

This document checks page layout, font rendering, line spacing and scrolling.

The quick brown fox jumps over the lazy dog. 0123456789

Punctuation: ! ? @ # $ % & * ( ) [ ] / : ; + =

Unicode: café naïve résumé piñata Zürich Ångström

Case test: ABCDEFGHIJKLMNOPQRSTUVWXYZ

Case test: abcdefghijklmnopqrstuvwxyz

2. Font sizes and styles

Small text: 8 pt - compact but readable.

Regular text: 11 pt - comfortable body size.

Large text: 18 pt - heading preview.

Bold weight and consistent baseline alignment.

3. Viewer checklist

Zoom in and out without losing text sharpness.

Scroll to the next page and navigate back.

Select or copy text if the reader supports selection.

Check that accented characters render correctly.

Tables and numeric alignment

Use this page to check grid lines, row spacing and clipping.

Test case	Expected	Input	Status
Text layout	Aligned	11 pt	PASS
Zoom sample	Sharp	200%	CHECK
Color contrast	Readable	Dark/Light	CHECK
Page navigation	4 pages	Next/Back	CHECK
Vector shapes	No artifacts	Curves	CHECK
Image raster	No distortion	RGB	CHECK

Alignment reference

Left

Center

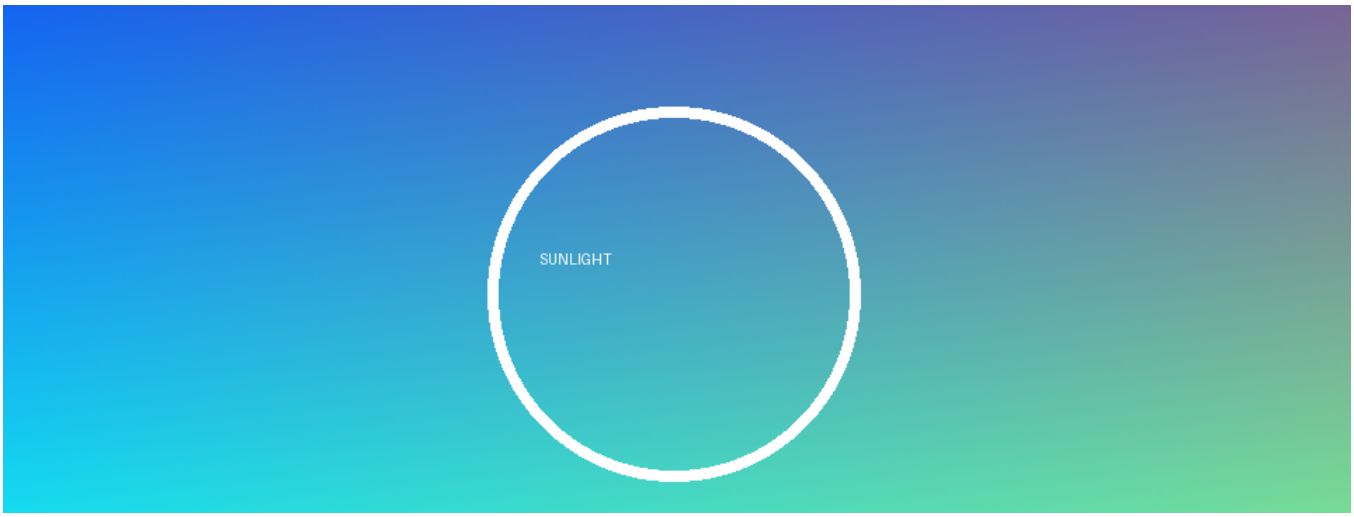

Right

Vector graphics and images

Shapes should remain crisp at every zoom level.

Embedded raster image (RGB gradient)

Confirm that both the vectors above and the bitmap render correctly.

Links, bookmarks and final checks

4. Interactive link test

Open the SunlightOS homepage (external link test)

This link points to example.com and is safe for a connectivity check.

5. Internal document navigation

Go to Page 1 - Typography

Go to Page 2 - Tables

Go to Page 3 - Graphics

6. Final validation checklist

- [ ] All four pages open and scroll correctly.
- [ ] Text is legible at 75%, 100%, 150% and 200% zoom.
- [ ] Tables, images and vector artwork display correctly.
- [ ] Page bookmarks and links respond when supported.
- [ ] The viewer stays stable while navigating rapidly.

End of test document. Happy building!
